## OFFSHORE ASIA THE FUTURE

The Asia Pacific is a dynamic offshore growth market. According to leading analysts, with an estimated capex of over US\$97 billion through 2009 to 2013, Asia is expected to witness an increase of 77% in terms of capex when compared to its previous five-year period. Asia is also expected to represent the second largest share of the global capex spend. With this renewed optimism coupled with the region's deepwater operations accounting for 10% of global capex the future looks bright for the continued growth and prosperity of Offshore Asia.

Offshore Asia will, for the first time, be held at the newly built Marina Bay Sands Resort, Singapore, 29-31 March 2011. Organizers predict a successful show with Singapore acting as an ideal hub for the entire Asia Pacific market.
