"IIME - Vietnam 2009" fascinated business alliances

The 17th International Industrial Machinery Exhibition (IIME - Vietnam 2009) moved to Saigon Exhibition & Convention Center (SECC) and continued with great prominence. 140 exhibitors from 11 countries and regions showcased a comprehensive range of trendy products and innovative technologies. Showing the international presence, international group pavilions such as China, Taiwan and Korea were also formed to participate in the fair. Over 12,000 trade visitors from 19 countries and regions attended the fair so as to keep abreast of the latest development of the industry. It reinforced its position as the most representative event of its kind in Vietnam.

"IIME - 2009 Vietnam" also symbolized the country's most vital sourcing opportunity in the fields of machinery, plastics, metal, printing, packaging and automation as well.

Return with more glory

For its eighteenth edition, "IIME - 2010 Vietnam" will be scheduled from 11 to 14 May 2010 in SECC and promise to come back with large scale.

Invest in the world-class industrial country - Vietnam

Industrial and machinery industry in Vietnam has developed rapidly over the past decades and shows great potential for development in the future.

Recently, a survey conducted by A.T. Kearney indicates that Vietnam has been ranked as the top 10 largest industrial countries in the world, the fastest growth speed over other Asian countries. Such industry is also making up a third of Vietnam's economy. In the first five months of 2009, the industrial production value increased by 4% in Vietnam as compared to the same period last year and by 5.1% in Ho Chi Minh City.

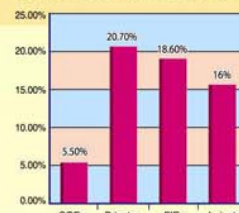

Targets in the first 5 months of 2009 increase in comparison with the same period last year

Fishery	4.4%
Plastic & Rubber	7%
Industrial production value	4%
Services	21%
Consumption Price	11.59%

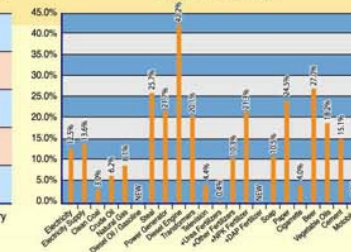

(Sources: General Statistics Office)

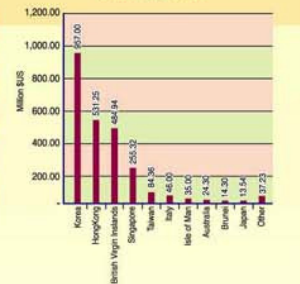

Target Industrial Contribution Growth in 2009 (By Sectors - Source: MOIT)

Target Industrial Growth in 2009 (By Sectors - Source: MOIT)

Top 10 Investors (New Licensed Projects) in Jan - Apr. 2009

In addition, even though the country has been affected by the global economic slowdown, it was on the track to hit the full-year target. Vietnam Ministry of Industry and Trade has expected the industrial output contribution growth of FDI segment remaining at high over 15% year on year. The average growth of industrial output is still forecasted over 16% as usual.

Targets to be reached in 2010

While stepping into the last segment of 2006-2010 Social-Economic programme, Vietnam government shows positive prospects to the year 2010 by setting the following targets:

- ◆ The industrial development with an average growth rate of 23% to 24%, GDP value of industrial industry accounting for 34% to 35% of the provincial GDP structure.
- ◆ The value of agricultural, forestry and aquaculture industries will account for 30% of the GDP, construction industry 35% and service industry 35%.
- ◆ Value of export will be USD 90 millions to USD 100 millions.
- ◆ Vietnam government planned to further ease FDI entry procedures and fully implements the Investment Law so as to welcome another \$38-41 billion in registered foreign capital in 2010.

"IIME - 2010 Vietnam" brings you excellent trading opportunities

However, along with the industrial development and booming demands from inside and outside the country, the issue of shortages of machinery and equipments has been buoyant. According to the Ministry of Industry and Trade, a large percentage of machines and equipments are imported from neighboring countries such as China and Malaysia every year. It implies unlimited trading opportunities for foreign and domestic investors in sectors of industrial machinery and mechanical in Vietnam.

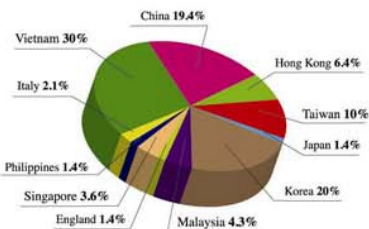

Therefore, "IIME - 2010 Vietnam" is a treasure marketplace for you to access into this emerged market and boost up your business!
